Hello Jennifer,

I'm sorry for the delay. DOEE's only suggestion (assuming EPA agrees to take the lead in establishing the new TMDL) is to add "and intends to do so." to the end of the following sentence in the first paragraph as follows:

Following these discussions, EPA received letters on _____ and _____ from MDE and DOEE, respectively, requesting EPA to establish the replacement total maximum daily loads (TMDLs) and intends to do so.

We should be able to get you our letter requesting EPA develop the TMDL by the 22nd.

Thanks
Jeff

Hi Everyone,

First, I wanted to say thank you to MDE for sending these comments. I also wanted to check with DOEE to see if there are any comments from the District. We plan to finalize the status report in late June and it would be helpful to have the letters of support by no later than June 22, 2018. Are there any concerns with meeting this deadline? We can schedule a conference call if needed. Thanks, Jen

Hello -

The following are brief comments from MDE:

1. Lee Currey requests the following:

Take "periodic" out of the sentence in first point of Status Report. Instead, say "EPA will have regular communications with MDE and DOEE."

2. In my notes from the call, I had that we would consider creating a workgroup. This could be added as a fourth item, if desired.

Thanks,
Anna

Hi Everyone,

Thank you for attending the call on May 9th. As part of the next steps, I'm forwarding the draft status report due July 2, 2018 per the court's March 30, 2018 order. Please review the draft status report and send comments by **COB Monday June 4, 2018**. As discussed on the call, I'm also forwarding letters from states requesting EPA to establish a bacteria TMDL for the Ohio River. These can be used as examples for Maryland and the District to consider in preparing letters requesting EPA to establish the revised Anacostia River Trash TMDL. We can schedule a conference call to discuss further if needed. Please let me know if there are any questions or if additional time is needed. Thanks, Jen
